

## Optimize your business performance with reliable, low-cost impact printing

### Legendary reliability, expanded head gap, and zero-tear capability for dedicated forms printing

The ML300 Turbo Series of SIDM (dot matrix) printers builds on the OKI® heritage of rugged reliability. These 9- and 24-pin printers are engineered to be tough enough for dedicated printing in the most demanding back office, point-of-sale, automation and utility applications.

They deliver fast output, can easily run twice as long as most printers in their class, and are economical enough to put wherever you need data on the spot.

#### Getting the job done, day in and day out

ML300 Turbo Series printers put the “work” in workstations for financial departments, wholesale or retail sales counters, even for harsh or warehouse or manufacturing environments. Their relentless performance comes from the design of their printhead... light, strong, efficient motor... long-lasting rack-and-pinion drive system... and a protective, impact-resistant chassis.

These printers can accommodate multipart forms and stocks that are up to twice as thick as those that fit their nearest competitors, and their printheads deliver a strong punch—providing clear, crisp text even on the last page of a 6-part form.<sup>1</sup>

The ML300 Turbo Series’ patented optical sensor accurately positions printheads for precise output, and their auto-tear feature accurately positions your continuous forms for a clean tear right at the perforation—eliminating wasted forms.

#### Accommodating your growing business

Drive your office productivity further, with the printers that can meet your needs today and in the future. Options include additional tractor kits, cut sheet feeders, and internal or external network connectivity.
